Fareham, United Kingdom

EDUCATION

Computer Science

University of Portsmouth, UK
2019 - 2022

Business, Computing, Math

Itchen College, UK
2017 - 2019

SKILLS

- **Backend**: PHP/Laravel, GoLang
- **Data**: PostgreSQL, MySQL, MongoDB, Redis, RabbitMQ
- **Frontend**: Vue, Pinia, React, Next.js, Redux, Tailwind CSS
- **Mobile**: Flutter, Dart, Bloc, async_redux
- **APIs**: REST, GraphQL, WebSockets
- **AI:** OpenAI API integration, Claude Code, Cursor
- **Infra**: Docker, Kubernetes, AWS, Google Cloud, Cloudflare, GitLab CI
- **Other**: Figma, Git, Jira, DDD/CQRS
- **Learning**: Kotlin Multiplatform, Swift, Kotlin

INTERESTS

Active lifestyle: travelling, skiing/snowboarding, surfing and kitesurfing.

LANGUAGES

English (native) / Russian (native)

Full-Stack Engineer specialising in PHP/Laravel, Vue/React and Flutter with 5 years of professional experience. Most recently, served as Lead Developer at DeinConsultant, delivering two production apps to the App Store and Google Play: Seller2Go, used by 100+ e-commerce merchants, and U+, an accounting app handling sensitive financial and identity documents in compliance with GDPR. Strong background in building Laravel backends, Vue/React front ends, and security-sensitive applications.

WORK EXPERIENCE

Lead developer · 2024-2026

***DeinConsultant** (remote, based in Germany)*

- Led the migration of Seller2Go's Go microservices to PHP/Laravel, and contributed to the custom PHP plugin that ingests and processes data from merchants' online stores.
- Built Seller2Go features across backend, web and app, including shipment tracking, notification settings with daily email digests, and Stripe licence payments.
- Delivered U+, an accounting app for sensitive financial data, owning both the Laravel backend and Flutter app: role-based access control, encrypted document storage, ID scanning, AI-powered features, notifications and multilingual support.
- Refactored the Seller2Go Flutter app end to end and released it on the App Store and Google Play, where it's used by 100+ merchants.
- Resolved Apple's B2B payment review by moving signup to a web-based flow, avoiding the 30% App Store commission.
- Implemented GDPR/AVV-related data protection measures, including explicit consent flows, upload limits, image compression and access controls.

Full-stack developer · 2022-2024

***Unilife.co.uk** - (remote, based in the UK)*

- Built and secured the internal bookings dashboard (PHP/Laravel, React, TypeScript), focusing on security hardening and reliability
- Rewrote legacy PHP APIs on AWS to integrate with the new Laravel backend
- Started development of the Unilife mobile app in Flutter, building the core architecture and main features
- Onboarded and mentored two junior developers, who took over and completed the mobile app

Backend developer · 2021-2022

VisionLabsAI (remote part-time)

- Improved a security risk-detection service in Go that aggregated data from multiple internal and external APIs
- Redesigned request handling to run concurrently, so slow external APIs no longer exhausted the network connection pool

Freelance & internships · 2019-2022

Built and maintained websites and e-commerce stores for small businesses (Laravel, Node.js, React, Flutter)

PROJECTS

- **U+** — Accounting app for German businesses with ID scanning, encrypted documents and AI features · Laravel, Flutter · Details / App Store / Google Play
- **Seller2Go Web** — Admin dashboard for Seller2Go · Laravel, React · Details
- **Seller2Go App** — Multi-store e-commerce management for 100+ merchants · Laravel, Flutter · Details / App Store / Google Play
- **Trade Local** — Marketplace app demo · Flutter, Go, Cloudflare · See video
